IOT WEB PLATFORM

MGrid centralizes acquired data, making it available to service providers. It supports data viewing, monitoring and exporting while providing interoperativity with third-party management systems.

FIXED READING

Solutions to automate meter reading and checking in indoor and outdoor locations. They offer an excellent return on investment over the long term.

LAN Local Area Network
Smart Kit and Gateway

Battery or mains-powered systems for automatic and periodic reading of M-Bus and wM-Bus devices by Maddalena and other manufacturers.

MOBILE READING

Solutions to speed up the reading and checking of meters in all installation conditions.

With a minimum initial investment, they allow the collection of consumption, leaks and faults data.

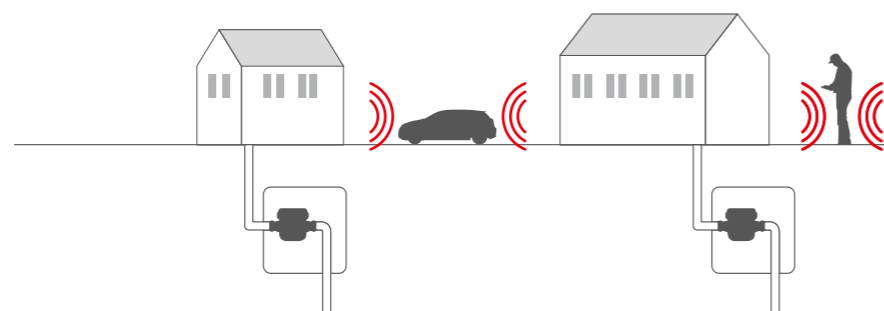

CSV FILE

WALK-BY AND DRIVE-BY

UniCo Tool
and Arrow Mobile

For reading wM-Bus radio meters by Maddalena and other manufacturers. They show reading data, location and status of the devices.

WAN Wide Area Network
IoT Networks

With the support of reliable partners we can provide data connectivity over wM-Bus, LoRaWAN and NB-IoT networks.
